REVERSE PARKING ASSIST SYSTEM (RPAS)

The device can assist in reverse parking by providing guide-lines to warn the driver about how close they are to obstacles.

Key Features:

◆ Accurate Parking Guidance

Navigate effortlessly into the parking spots with real-time feedback and guidance from our intuitive system.

◆ Geofencing Technology

Set custom boundaries to receive alerts and prevent collisions in designated areas, enhancing safety and security.

◆ High Resolution Images

Capture every detail on the road with crystal-clear precision using high-resolution images from the camera.

◆ User-Friendly Interface

Enjoy a simple and user-friendly interface that enhances the overall parking experience for drivers of all skill levels.

◆ Cloud Based Location Tracking

Seamlessly track your vehicle's location in real-time through cloud-based technology, ensuring precise and secure data for your camera.
