

# IMDS Services

Analyze.  
Document.  
Maintain.

## Simplify IMDS Compliance

Material reporting requires in-depth chemical engineering knowledge, knowledge of materials, and constant follow up with sub-suppliers to validate data for successful IMDS submissions. We specialize in helping Tier 1, 2, and 3 automotive suppliers submit all required information in the International Material Database System (IMDS). Our IMDS services include data preparation, data entry and reporting, and ongoing data revisions and updates.

### IMDS Services:

- » Create material data sheets (MDS) and material modules specific to supplier parts
- » Convert material modules to MDS
- » Complete management of IMDS data entry initiatives
- » Coordinate with all supply chain stakeholders to collect correct data
- » Validation and quality checks of supplier, sub-suppliers, manufacturers MDS
- » Successful IMDS submissions that are in compliance
- » Alignment IMDS part numbers with PPAP submissions
- » Monitor IMDS for necessary revisions

## 3 Tier Approach

1

### Complete Supply Chain Solution

Our IMDS services considers the entire supply chain including manufacturers, suppliers, sub-suppliers, and customers. This includes validation through quality checks of material data sheets (MDS).

2

### Management of IMDS Data Entry Initiatives

We guide manufacturers, suppliers, and sub-suppliers in creating IMDS data per customer requirements. We coordinate with all stakeholders in the supply chain to ensure accurate material data is collected for successful IMDS submissions.

3

### IMDS Compliance and Ongoing Maintenance

IMDS compliance is not a one-time task but requires ongoing maintenance. As parts go through updates, we ensure that all material revisions are incorporated into ongoing updates for maintenance in the IMDS database.
